

Community Presentation on 5G Technology

Monday, September 23, 2019 7:30PM-9PM followed by Q&A

**Hosted by the
Oasis Family Medicine Inc. and US Brain Tumor Association**

Verizon "Small" Cell installed in Santa Rosa, CA

5G is Coming to Our Community

Hear from a premier expert from Washington DC focused on the health, safety and policy issues associated with the 5G rollout:

1. 5G means a cell tower on electric and light poles every 2 to 10 homes with or without your knowledge or consent.
2. Wireless technology has never been safety tested and it is not post market surveyed for biological harm.
3. Current FCC safety guidelines for radio frequency emissions for all wireless transmitters only protect us from heating effects and do not account for long-term exposure biological effects.
4. Thousands of peer-reviewed studies have found alarming biological effects at radio frequency levels well below the FCC guideline. (Visit UC Berkley School of Public Health SaferEMR.com, Physicians for Safe Technology at MDSafeTech.org and EHTrust.org for more information)

Come Join Us (RSVP required)

Monday, September 23, 2019 at 7:30PM-9PM followed by Q &A
La Crescenta Library, 2809 Foothill Blvd, La Crescenta, CA 91214
Community Room Located Behind the La Crescenta Library

Learn what 5G means for La Crescenta residents, what alternatives are available and what you can do to protect yourself and your family.

Space is limited; RSVP required please email "Count Me In" to LaCrescentaAgainst5G@gmail.com

We Hope to See You There!!
